Professional Summary

Frontend Developer with 2+ years of experience building scalable, high-performance applications using the React ecosystem. Skilled in Next.js, TypeScript, Redux, and Tailwind CSS, with a focus on crafting modular, responsive interfaces. Delivered measurable results, including improving page speed by 25%, reducing UI development time by 30%, and accelerating data handling by 35%.

Technical Skills

Core Frontend: React.js, Next.js, JavaScript (ES6+), TypeScript, HTML5, CSS3

State Management: Redux, Context API, React Hooks

UI & Styling: Tailwind CSS, Bootstrap, Responsive Design, Figma

Testing & Deployment: Jest, Vitest, GitHub Actions, Netlify, Vercel

API & Tools: RESTful APIs, GraphQL, Webpack, Vite, Git, GitHub

Areas of Interest: Data Structures and Algorithms, Solution design, AI-assisted Development (Copilot, Cursor)

Experience

Frontend Developer, Techenhance Apr 2025 – Present

- Developed a CRM platform using Next.js and TypeScript, automating workflows that cut manual lead tracking by 40% and improved sales efficiency.
- Delivered advanced reporting and filtering modules via GraphQL and REST APIs, boosting data access performance by 35% and enabling faster insights.
- Built over 20 modular UI components with Tailwind CSS, reducing interface development time by 30%.
- Streamlined deployment through Git workflows and CI/CD pipelines, lowering release errors by 50% and accelerating delivery cycles.

Frontend Developer, Remote Contracting Jul 2024 – Mar 2025

- Designed responsive web interfaces with React.js, Next.js, and Tailwind CSS, boosting mobile usability by 30% and ensuring cross-device consistency.
- Optimized rendering and asset loading, reducing page load times by 40% and enhancing SEO rankings.
- Integrated secure APIs for payments and real-time data fetching, ensuring smooth transactions and live updates.
- Maintained production deployments with 99.9% uptime via Vercel and Netlify.

Frontend Developer, AGM Global Solutions May 2023 – Jun 2024

- Engineered high-performance web applications using React.js and Next.js, enhancing page load speed by 25%.
- Modularized the UI with reusable components, reducing redundant code by 40% and improving maintainability.
- Optimized Core Web Vitals by 20% through lazy loading, code splitting, and Webpack optimizations.
- Collaborated with designers to enhance UX, boosting user engagement by 35%.

Projects

Smart Pizza Order System Live Demo

- Implemented a real-time ordering platform with interactive cart management, reducing load times by 30%.
- Tools Used: React.js, Tailwind CSS, REST API, Tanstack react query

Education

S.V University, B.Sc in Computer Science Jun 2017 – Dec 2020

- GPA: 82%
